the *Peia*'s of

Heeia fishpond
is no'wahine

Mehearnu

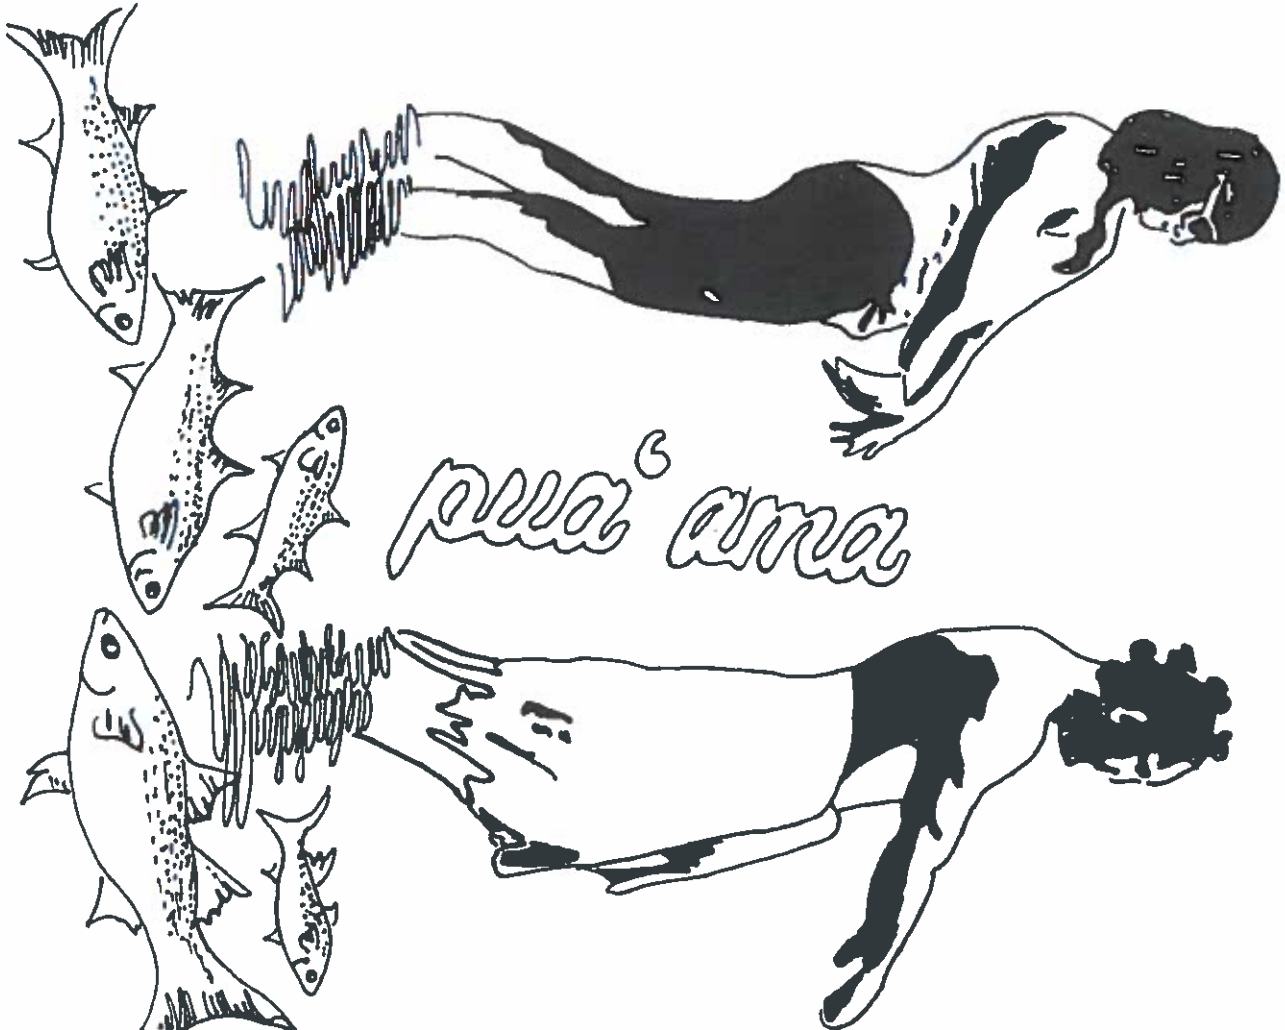

her models
reflects the
nutrient cycle
in *Heeia fishpond*

MEHEARN'S visit ensures that the

ia are well fed and well
taken care of

peia'ama

Mehanus mumi

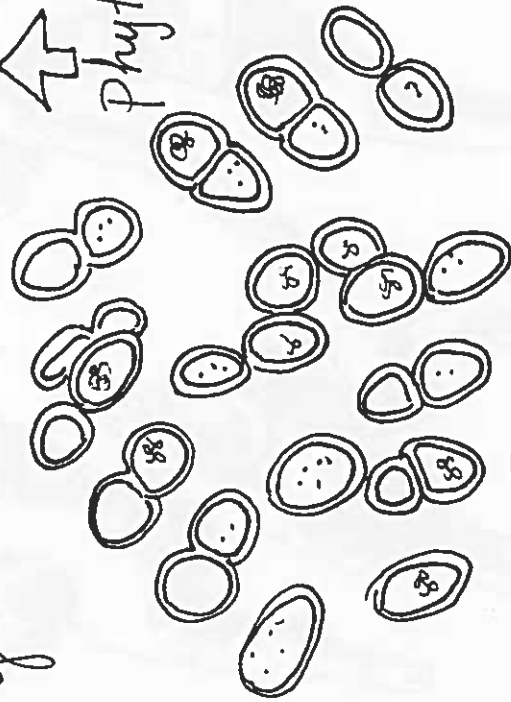

↑ NH₄ ↑

causing ...

↑ in
Phytoplankton

have to
yellow

↑ food

that the Pua'ama
like to eat

Hall

when
Mehanus
visits the loko
in mo'o forms,
the hair
turns yellow.

Mehanus

Nitrogen is a very important
NORIENT in the fishpond

forms of Nitrogen in environment:

N_2 nitrogen gas

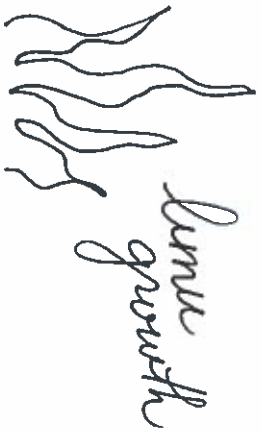

NO_3 nitrate

NO_2 nitrite

NH_4 ammonia

cycled by:
biological &
chemical processes

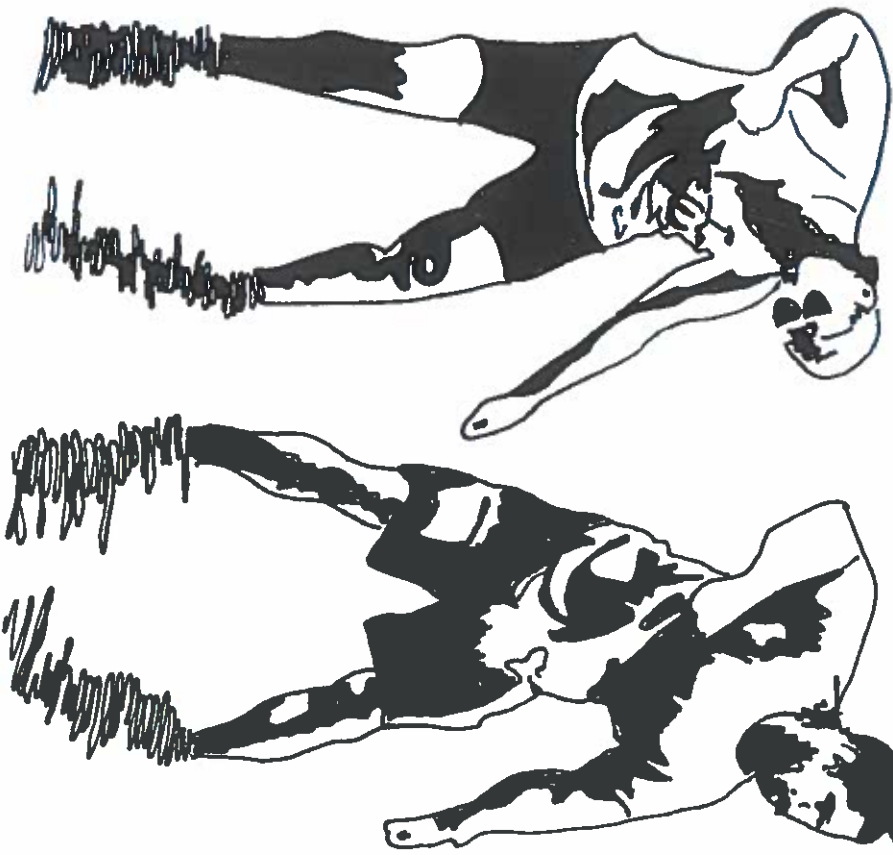

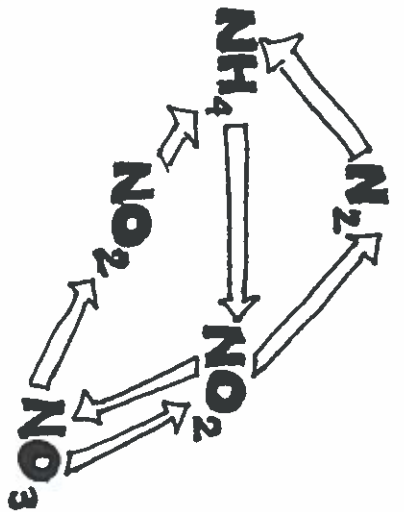

the amount of nitrogen in the
fishpond influences...

lens growth

?

decomposition

Nitrogen cycle
